

MAWLANA BHASHANI SCIENCE AND TECHNOLOGY UNIVERSITY
SANTOSH, TANGAIL-1902

DEPARTMENT OF INFORMATION AND COMMUNICATION TECHNOLOGY

Lab Report

Lab Report No : 01

Lab report name : Hands on practice HTML table and Form.

Course Title : Web Application Development Lab

Course Code : ICT-3204

Submitted By	Submitted To
Name: Monirojjaman Ayoive ID: IT-23013 3 rd Year, 2 nd Semester Session: 2022-2023 Dept. of ICT, MBSTU	Mr. Md. Anowar Kabir Lecturer, Dept. of Information and Communication Technology Mawlana Bhashani Science and Technology University (MBSTU)

Date of Performance: 07/05/2026

Date of Submission: 14/05/2026

1. **Lab Title:** Hands on practice HTML table and Form.

2. **Lab No:** 01

3. **Introduction:**

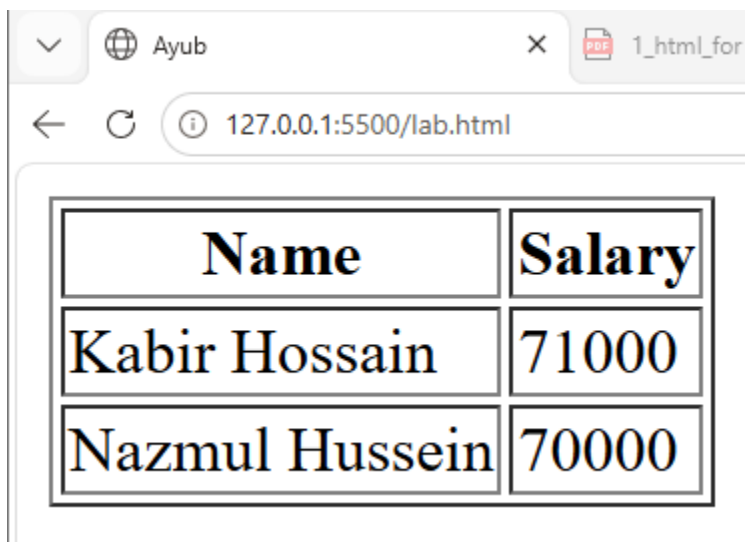

HTML is the basic language for making web pages. While I learning html, I found two topics here one is html tables and html forms. In html part we use many tags like `<table>` `<th>` `<tr>` `<td>` `<caption>`. Without those tags more attributes are available like `colspan` and `rowspan` etc.

4. **Objectives:**

1. To learn how to create table.
2. To use `<table>`, `<tr>`, `<td>`, `<th>`, `rowspan`, `colspan` tags.
3. To create a html form.
4. To understand proper use `<input>` `<label>` `<select>` `<textarea>` `<button>` `<fieldset>` `<legend>` `<datalist>` `<output>` `<option>` `<optgroup>` tags.

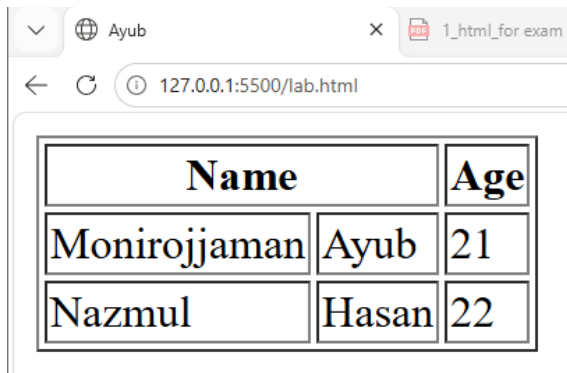

5. **html table making:**

5.1: Using `<table>` `<th>` `<td>` `<tr>` a table is created in below:

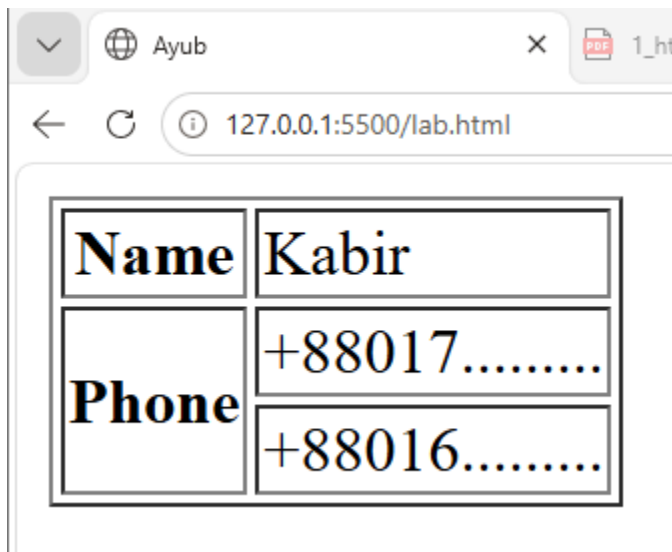

Name	Salary
Kabir Hossain	71000
Nazmul Hussein	70000

5.2: Using <colspan> and a table is created in below:

Name		Age
Monirojjaman	Ayub	21
Nazmul	Hasan	22

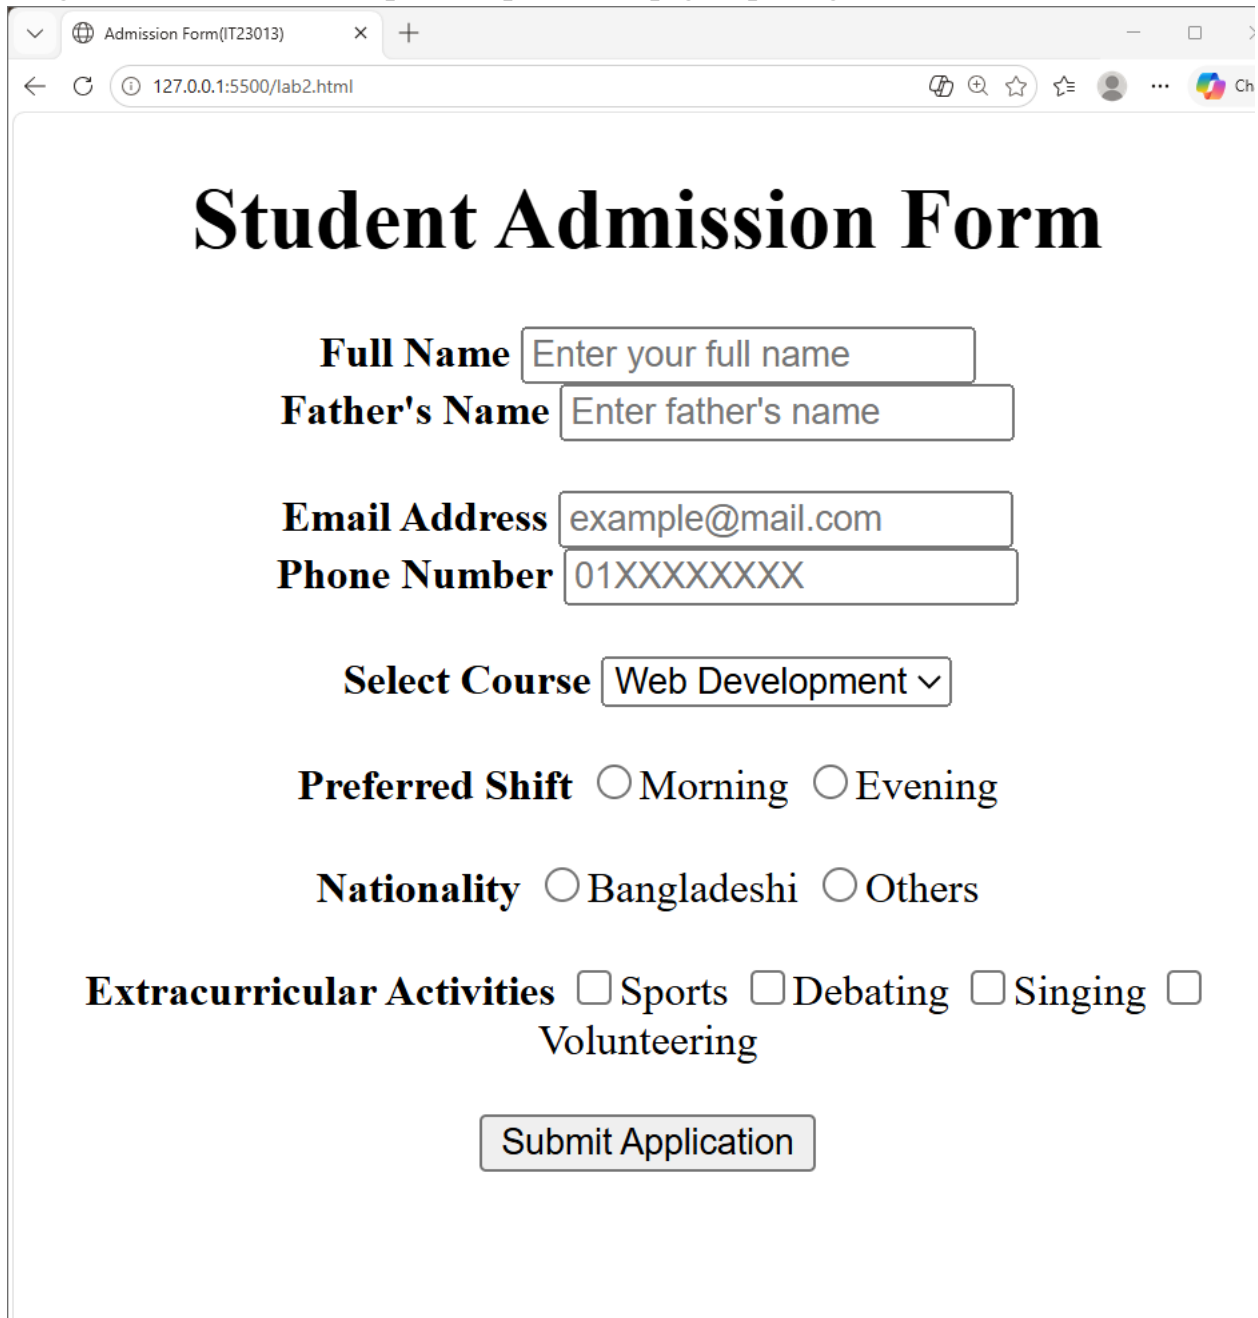

5.3: Using <rowspan> and a table is created in below:

Name	Kabir
Phone	+88017.....
	+88016.....

6.1:

HTML Form making using `<input>` `<label>` `<select>` `<textarea>` `<button>` `<fieldset>` `<legend>` `<datalist>` `<output>` `<option>` `<optgroup>` tags.

The screenshot shows a web browser window with the title "Admission Form(IT23013)". The address bar shows the URL "127.0.0.1:5500/lab2.html". The form is titled "Student Admission Form" and contains the following fields and controls:

- Full Name**: A text input field with the placeholder text "Enter your full name".
- Father's Name**: A text input field with the placeholder text "Enter father's name".
- Email Address**: A text input field with the placeholder text "example@mail.com".
- Phone Number**: A text input field with the placeholder text "01XXXXXXXXX".
- Select Course**: A dropdown menu with "Web Development" selected.
- Preferred Shift**: Two radio buttons labeled "Morning" and "Evening".
- Nationality**: Two radio buttons labeled "Bangladeshi" and "Others".
- Extracurricular Activities**: Four checkboxes labeled "Sports", "Debating", "Singing", and "Volunteering".
- Submit Application**: A button with the text "Submit Application".

7. Conclusion:

The experiment is complete successfully implement several HTML tables and interactive form. I specifically practice how to merge table cells using Rowspan/Colspan and how to collect diverse user data through various form element like Select, Radio, and Checkbox. The output confirm that the code is structured correctly according to HTML standard. These skills are fundamental to building any static or dynamic web interfaces.

5.1:

```
<html>
<head>
  <title>Ayub</title>
</head>
<body>
  <table border="1">
    <tr>
      <th>Name</th>
      <th>Salary</th>
    </tr>
    <tr>
      <td>Kabir Hossain</td>
      <td>71000</td>
    </tr>
    <tr>
      <td>Nazmul Hussein</td>
      <td>70000</td>
    </tr>
  </table>
</body>
</html>
```

5.2:

```
<html>
<head>
  <title>Ayub</title>
</head>
<body>
  <table border="1">
    <tr>
      <th colspan="2">Name</th>
      <th>Age</th>
    </tr>
    <tr>
      <td>Monirojjaman</td>
      <td>Ayub</td>
      <td>21</td>
    </tr>
    <tr>
      <td>Nazmul</td>
      <td>Hasan</td>
      <td>22</td>
    </tr>
  </table>
</table>
</body>
</html>
```

5.3:

```
<html>
<head>
  <title>Ayub</title>
</head>
<body>
  <table border="1">
```

```

<tr>
  <th>Name</th>
  <td>Kabir</td>
</tr>
<tr>
  <th rowspan="2">Phone</th>
  <td>+88017.....</td>
</tr>
<tr>
  <td>+88016.....</td>
</tr>
</table>
</table>
</body>
</html>

```
